

HELP FOR OPTIONS

PURPOSE: The Options Tab is used to view and update Options used on some of the other pages.

When to Use the Options

To customize some of the features on the other pages

Many of the options here are used on more than one other page

How to Use the Options

Minimums

Minimums can be set for **Visibility, Ceiling and Temperature**. These minimums are used to set the background colors displayed for the corresponding METAR data on the Current WX and Forecast pages.

By default the background is set to **green**.

If the **Warn** value is exceeded, the background is set to **yellow**.

If the **Min** value is exceeded, the background is set to **red**.

Maximums

Maximums can be set for **Wind Speed, Gust and Crosswind and Temperature**. These maximums are used to set the background colors displayed for the corresponding METAR data on the Current WX and Forecast pages.

By default the background is set to **green**.

If the **Warn** value is exceeded, the background is set to **yellow**.

If the **Max** value is exceeded, the background is set to **red**.

METAR Stations

A list of METAR stations that will be used on the METARs & TAFs page

METAR time period, Translate and TAFS

Used to set the corresponding fields on the METARs & TAFs page

Default Station

The ID of the Default Station on the Current WX and Forecast pages

Favorite WX Stations

A list of Favorite Stations that will be displayed on the Current WX and Forecast pages with abbreviated weather information

User Defined URLs

There three pages allocated for User Defined URLs. These pages can be set to navigate to a web page when selected. The name to be displayed on the page is entered in the first text field. The URL (address) of the Web page is entered in the second text field.

Weight & Balance Default Airplane

The default airplane on the W&B page

Weight & Balance Default Email Address

The default email address used on the W&B page

T&L, Area WX and Crosswind Options

Use these buttons to get to these Options pages

Reset Max/Min to Default Button

Touch this button to reset the Max/Min fields to their default values
